CONTENTS

Chapter 1. Soliton models for nuclear physics
M. C. BIRSE 1

Chapter 2. CP violation and the flavour structure of weak interactions
K. KLEINKNECHT 81

Chapter 3. Weak non-mesonic decays of Λ-hypernuclei
J. COHEN 139

Chapter 4. Many-body theory of high energy heavy ion reactions
W. CASSING and U. MOSEL 235

Chapter 5. Isospin and F-spin in the interacting boson model
J. P. ELLIOTT 325

Contents of Some Previous Volumes 353
